

Keep warm, save money, help save the planet.

“The single most useful intervention I have had in my home since I started doing improvements”

Bristol Green Doors participant 2019

We are a low-cost, award-winning home thermal imaging service in the Bristol and Bath area that shows you how to cut energy loss, save on heating bills and help fight climate change.

Delivered by

CHEESE

Cold Homes Energy Efficiency
Survey Experts

The cost effective way to a warmer home AND lower energy bills.

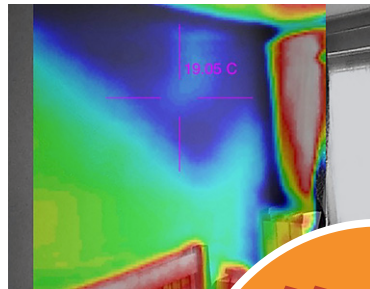

“Once you see it, you know you can fix it.”

Survey Customer

We work with communities as a non-profit to tackle fuel poverty and energy waste. We use thermal imaging *inside* your home, room by room with you, so you can see and understand your home's heat-loss problems.

You keep the video of the survey and we give you tips on low-cost solutions to the issues we identify. A third of energy loss can be from draughts – and you can fix these with targeted DIY and about £100.

Surveys start at just £135 and can be **FREE** to those on low incomes or in fuel poverty.
